Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10, 16-21, 24-29 and 33-37 are rejected under 35 U.S.C. 102(b) as being anticipated by Webster et al.

There is disclosed in Webster a hot water dispensing apparatus for use with a beverage maker having a source of heated water, the hot water dispensing apparatus comprising: a housing (see figures 1-3) being removably attached to the beverage maker; a controllable valve 4 carried on the housing; and a water delivery line 48 associated with the housing, beverage maker and valve to dispense water from the maker through the valve. The valve (see figure 3) being removable from the housing by way of a rotatable connection. The housing is inherently removable from the beverage maker (see figure 2) by way of some type of connecting means.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 14, 15, 23, 31, 32 and 39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Webster et al. in view of Pandolfi.

Pandolfi discloses the use of fasteners (bolts) to connect a hot water dispensing housing to a beverage maker. It would have been obvious to one skilled in the art to connect the housing of Webster with fasteners, as disclosed in Pandolfi, in order to provide a secure fit thereto.

In regards to the use of brackets, such can be considered to be the equivalent of a fastener.

Allowable Subject Matter

Claims 11-13, 22, 30 and 38 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patent to Anderson is cited for its disclosure of the state of the art.
